

"MUSCLE MASTER" - FASE D BULGROEI

Voeraanbeveling

"Fase D Bulgroei" is geformuleer vir die optimale uitgroei en spierontwikkeling van jong bulle. Kan ook gebruik word as 'n voerkraal voer. Aanpassing: Beperk die inname van "Fase D Bulgroei" tot 1% van die dier se lewende massa gedurende die eerste 5 - 7 dae om spysverteringsteurnisse te voorkom. Voer 50% van die totale voer in die oggend en 50% in die agtermiddag. Voer ad lib in voerkraal of as byvoeding op veld. Sorg dat voerbakke altyd vol is.

SAMESTELLING

	Min.	Maks.	Eenheid
Ru-Proteïen	140		g/kg
Proteïen ex NPN		6,0	%
Ureum		30	g/kg
Vog		120	g/kg
Ru-Vet	25	75	g/kg
Ru-Vesel	70	150	g/kg
Kalsium	8	10	g/kg
Fosfor	3,5		g/kg

Ander Inligting van belang

- Unieke balans van nutriente en voersamestelling verseker voorkoming van spysvertering steurnisse.
 - Voorkoming van rumen wand skade en afwesigheid van hoefgroei.
- Voersamestelling verseker dat diere weer gemaklik op veld kan aanpas na
 - 'n intensiewe Fase D voerkraal fase van 84 dae.
 - 'n Verwagte GDT van 2.0 kg/dag.
